11 July 2014   **FOR IMMEDIATE RELEASE**

Molemole Municipality is proud to announce that it has improved its audit outcomes in the 2012/13 financial year to a qualified opinion with findings.

This outcome though not perfect, it is the best audit outcome in a space of six (6) past years since the 2006/7 financial year. The institution was trapped in haemorrhaging pervasive disclaimers for six year in a row. This cycle for the past six years since 2006/7 has been an albatross that has hopefully now been removed from its neck forever.

This albatross shall be removed forever if the institution continues to work the way it has been or even better in the years ahead. The pleasant outcome is reflected against the backdrop of the audit of about 25 municipal auditees in the Limpopo where only one (1) auditee obtained an unqualified result with findings.

This result is a reflection of the following:

- Unity of Purpose
- Good Governance
- Political Stability
- Improving Service Delivery
- Improving Skill of a continuously learning institution.

The Mayor, Her Council, Management and staff should pride themselves to have turned the corner into being an improving lot; suffice to say that all should shrug the dust of all the past and prepare to sweat it out in the coming financial year(s).

This is a sign of good times to come, a sign to usher in our new pay-off-line viz;

"Kopano ke Maatla go Aga Setshaba se Kaone, mengwageng e Masomepedi Le Go ya Pele."

....END..
