

# MOLEMOLE LAUNCHES NEW TRAFFIC MANAGEMENT SYSTEM

*The new traffic Management is more than just technology its about making our municipal road safer and enjoyable to ride on*

**08 SEPTEMBER 2025**

Mayor Cllr Masilo Edward Paya and his entourage officially launched the traffic management system at the N1 Sekonye crossroad in Botlokwa. This state of the art system is designed to streamline traffic law enforcement, particularly in the issuing of fines and the tracing of outstanding warrants. This is a significant leap forward in the municipality's efforts to modernise traffic operations and enhance road safety for all road users. Traffic officers were deployed on site actively managing vehicle flow and ensuring public safety during the transition period. This initiative was a collaborative effort, with support from Molemole fire and Rescue, SAPS and Provincial Traffic Department all working together to ensure the success of the launch.
